

SOYBEAN VARIETY XB64C04

Abstract

5 According to the invention, there is provided a novel soybean variety,
designated XB64C04. This invention thus relates to the seeds of soybean variety
XB64C04, to the plants of soybean XB64C04, to plant parts of soybean variety
XB64C04 and to methods for producing a soybean plant produced by crossing
soybean variety XB64C04 with another soybean plant, using XB64C04 as either the
10 male or the female parent. This invention also relates to methods for introgressing a
transgenic or mutant trait into soybean variety XB64C04 and to the soybean plants
and plant parts produced by those methods. This invention also relates to soybean
varieties or breeding varieties and plant parts derived from soybean variety
XB64C04; to methods for producing other soybean varieties or plant parts derived
15 from soybean variety XB64C04 and to the soybean plants, varieties, and their parts
derived from use of those methods. This invention further relates to soybean seeds,
plants, and plant parts produced by crossing the soybean variety XB64C04 with
another soybean variety.
